Maths Olympiad

Southern Africa 2024

29 July - 2 August

Dear Parent,

Matific, a digital primary maths learning platform, is running a maths competition, and we're excited to be taking part. Participating in the Matific Maths Olympiad is the perfect way to:

Create a love of maths

Reduce learning loss

Reduce maths anxiety

Boost maths outcomes

By completing maths activities and earning stars in the award-winning Matific program, your child will keep progressing in mathematical competency and help themselves, their class and their school compete for trophies and recognition!

Participation

The online platform is available FREE of charge for all participants. Your child's class will be taking part at school, and your child can compete while at home, too.

Exciting prizes are up for grabs!

All students get certificates. Takealot vouchers worth R200 will be awarded to the top 3 students in each grade nationally.

The best part about this competition is that screen time is truly a learning time. An academic study showed that Matific helps improve students maths test results by 34%.

I hope you and your child enjoy The Matific Maths Olympiad!

Sincerely,

Your child's teacher
